INTERNSHIP/COURSE WORK

Flow Logic Solutions Business Development & Analytics Intern **April 2026 - May 2026**

- Engaged directly with prospective clients and stakeholders to gather requirements, translating business needs into a fully deployed corporate website — including hosting, domain setup, branding, and SEO
- Interacted with customers on the IndiaMART platform to understand requirements and support lead generation, applying a structured approach to capturing business needs
- Presented products and solutions to clients and senior stakeholders at industry exhibitions, building rapport across cross-functional and customer-facing teams
- Built an interactive Tableau dashboard to analyze sales performance, translating data into actionable business insights for stakeholder decision-making

Socially Relevant Project, Arivu Vidya Samasthe, Mysuru **December 2025**

- Conducted primary and secondary stakeholder research with Arivu Vidya Samasthe, Mysuru-using alumni surveys, interviews, campus observations, and post-secondary research to gather requirements and identify institutional pain-points
- Translated research findings into actionable recommendations on teacher development, digital adoption, and organisational sustainability

Projects/Research

- InvoiceIQ:** Designed a GCP-based AI multi-agent solution to address business requirements around invoice creation, payment risk scoring, and reminders — translating an operational pain-point into an automated IT solution.
- Deal Win-Loss & Deal Value Prediction:** Built a two-stage classification and regression model to predict proposal outcomes and contract value for an IT services firm's bidding process. Supported data-driven decisions on deal prioritisation and estimation.
- Car Price Prediction:** Applied multiple linear regression and ANOVA across 205 vehicle models to identify key business drivers behind pricing, supporting data-driven decision-making.

SKILLS AND CERTIFICATIONS

- SAP Business Analyst Professional Certificate-** requirements documentation, business process mapping, and translating business needs into functional specifications.
- Business Analysis & Tools:** Requirements gathering, stakeholder management, project planning, reporting and presentation; MS Office (PowerPoint, Word, Excel)
- Data & Analytics:** Google Data Analytics Professional Certificate -Excel, Python, SQL, Tableau
- Technology & Development:** Full Stack Web Developer (Coding Ninjas)- JavaScript (MERN stack), Infosys Springboard - Software Design and Development, SDLC Phases.
- AI/ML:** Google Cloud Gen AI Academy APAC-2026, AI Fluency: Framework & Foundations (Anthropic)
- Communication skills, Analytical Thinking, Team Management.

AWARDS, HOBBIES AND EXTRA CURRICULARS

- McKinsey Forward Program-Foundation & Advanced Badges**, reflecting structured problem-solving and business fundamentals.
- Core Member, FINNACLE** (College Finance and Economics Club) ,organized multiple intra- and inter-college events, building networking and leadership skills across cross-functional teams
- Volunteered** at college fests and international conferences (Naissance, Vision Mysuru, Pratigam), coordinated with diverse stakeholders under time-bound deadlines
